**Hiring Team**

EverestX Technologies

hire@everestsx.com

Dear Hiring Team,

I am writing to express my strong interest in the AI Engineer Intern position at EverestX Technologies. With a passion for artificial intelligence, hands-on project experience, and a solid foundation in mathematics and programming, I am excited about the opportunity to contribute to your innovative team.

I am currently pursuing a BSc (Hons) in Information Technology, specializing in Data Science, at SLIIT. My academic background is firmly rooted in analytical thinking and problem-solving, having achieved an A in Combined Mathematics, B in ICT, and C in Physics in my GCE Advanced Level examinations, with a Z-score of 1.62. These results reflect my natural affinity for technical subjects and analytical reasoning, key traits that have guided my decision to pursue a career in AI.

Beyond academics, I have developed an Online Stock Management System using Java and MVC principles, and I am currently working on a Django-based shopping cart application. I also engage in continuous self-learning through platforms like Udemy and YouTube channels such as CodeBasics and Krish Naik, which have enriched my understanding of deep learning, NLP, and model deployment using TensorFlow, Keras, and PyTorch.

I am particularly drawn to EverestX Technologies for its focus on cutting-edge AI/ML innovation and collaborative work culture. I am confident that my strong foundation in Python, Java, and deep learning combined with my drive to learn and contribute would make me a valuable addition to your team.

Thank you for considering my application. I look forward to the opportunity to bring my passion for AI to EverestX Technologies and contribute meaningfully to your mission of shaping the future of intelligent systems.

Warm regards,

**Ahamed Huzaifa**
